

# Anatomy Pathways™ for VH Dissector™

## Axial Skeleton – Bony Thorax

Identify the following structures in the images below.  
(Some structures may be visible in more than one image.)

sternum • manubrium • body of sternum • sternal angle  
xiphoid process • true (vertebrosternal) ribs • costal cartilage • false (vertebrochondral) ribs  
floating ribs • head of rib • articular tubercle of rib • articular facet

What is the *thoracic cage*?
