

Anatomy Pathways™ for VH Dissector™

Muscular System – Neck, Chest & Back Muscles

Identify the following structures in the images below.
(Some structures may be visible in more than one image.)

sternocleidomastoid • splenius capitis • semispinalis capitis • longissimus capitis
suprahyoids • infrahyoids • pectoralis minor • deltoid • pectoralis major

Muscular System – Neck, Chest & Back Muscles

Identify the following structures in the images below.
(Some structures may be visible in more than one image.)

trapezius • teres major • teres minor • latissimus dorsi
infraspinatus • subscapularis • serratus anterior • levator scapula • supraspinatus
rhomboid major • rhomboid minor • erector spinae
