

Anatomy Pathways™ for VH Dissector™

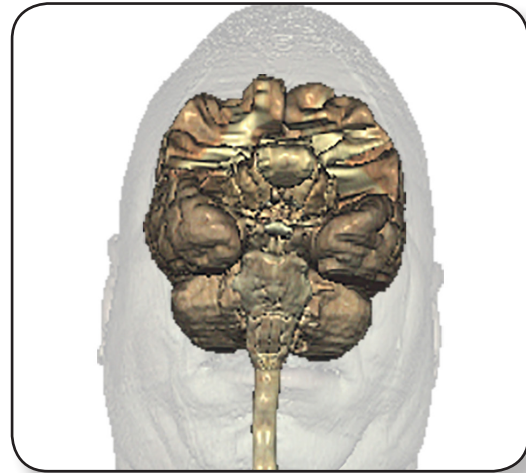

Brain Anatomy

Identify the following structures in the images below.

(Some structures may be visible in more than one image.)

cerebrum • gyrus • fissures • longitudinal fissure • sulcus • frontal lobes
cerebral hemispheres • temporal lobes • parietal lobes • parieto-occipital sulcus
occipital lobes • genu of corpus callosum • trunk of corpus callosum
cerebellum • transverse fissure • hypothalamus

What is *cerebrospinal fluid* and where is it found?

Brain Anatomy

Identify the following structures in the images below.
(Some structures may be visible in more than one image.)

ventricles • lateral ventricles • third ventricle • fourth ventricle • tentorium • pons
medulla oblongata • right & left pyramids • decussation of the pyramids • midbrain
tectum • superior colliculus • inferior colliculus • reticular formations
diencephalon • thalamus • epithalamus • pineal body

What is the function of the *choroid plexus*?

What composes the *brain stem*?
