

# Anatomy Pathways™ for VH Dissector™

## Urinary System

Identify the following structures in the images below.  
(Some structures may be visible in more than one image.)

kidney • renal pelvis • ureter • urinary bladder  
external urethral sphincter • male urethra

Why do males have an *internal urethral sphincter* and females do not?

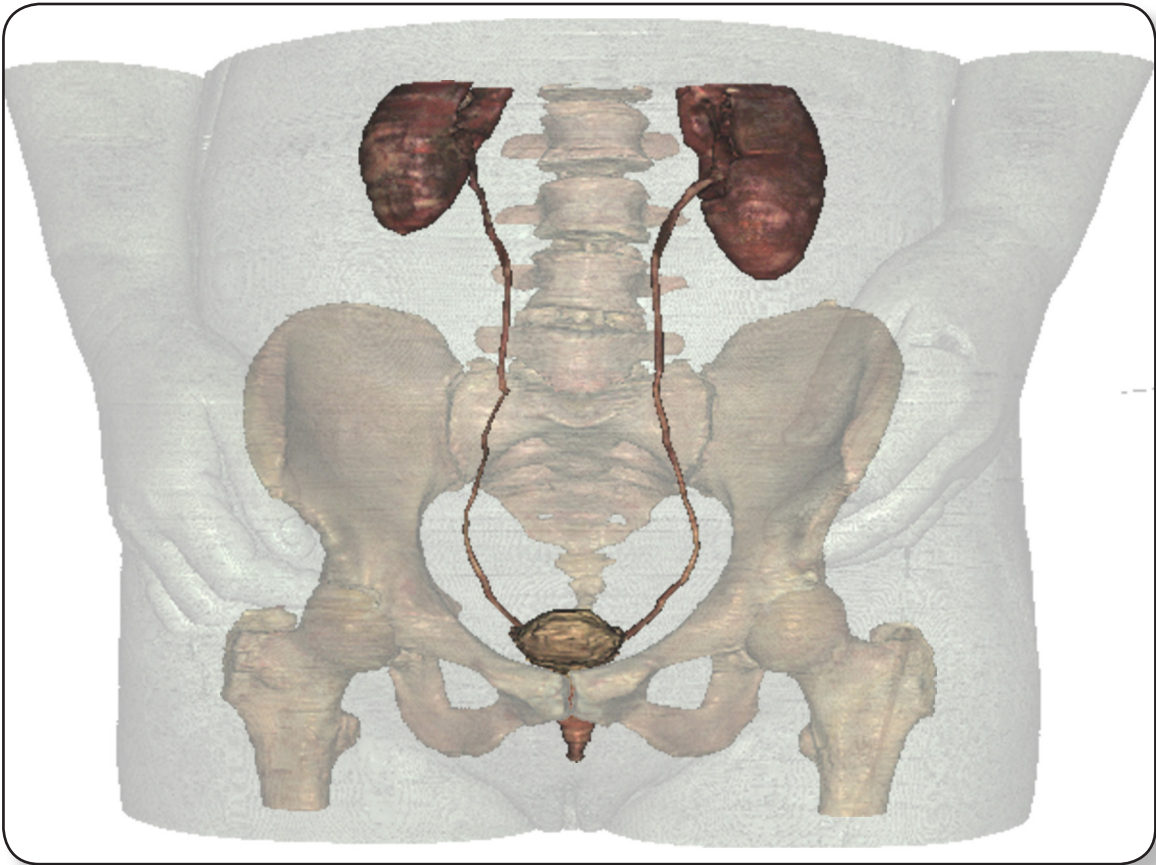

---

---

# Urinary System

Identify the following structures in the images below.  
(Some structures may be visible in more than one image.)

kidney • renal pelvis • ureter • urinary bladder  
external urethral sphincter • female urethra

What is the function of the external urethral sphincter?
